heo Eyster heis aland the suffy niches June 28/69_

Mint of the United States, MELTING & REFINING DEPARTMENT. Philadelphia, 25th June 1869

Hou. James Pollock Director of the U.S. Mint. Dear Sir.

In response to your queries in relation to Mickel, I have made the examination in regard to the quantity on hand, & the quantity used up each day.

1. Nickel. There is about 6000 les. on hand, viz. 5849 lbs. pure nickel in boxes, yet unopened, and about 200 lbs. opined.

2. There are 50 lbs. There nickel weighed out each day for each of the seven furnaces, making a daily total weight of 350 lbs for all the furnaces.

Taking repairs, into account, we average 5 full days work in the week, so that the weekly consumption of nickel is 1750 lbs. per weeks

another basis of balculation is the average weight of Ingots made by each man per day, which

Spound to be about 350 lbs. Hence for the seven furnaces the amount of Ingots made per day is about 2450 Us. Long experience has shown that nearly one half of this is new metal & one half ingotalippings. Therefore about 1225 lbs. new metal made each day, which contains 306 lls pure nichel, or @ 52 days, it amounts to 1683 lbs. per week. 3. Hence at the former rate of consumption we have a supply of pure nickel on hand for 32 weeks or for 3 weeks & 3 day, and at the latter rate for 3 weeks 4 days. If we take the latter at 5 days per week in Head of 5 1 days, the supply is sufficient for 3 weeks 4 6 days. H. as nearly as we can estimate, The demand for 5 cent metal seems tobe about \$5000 = pr. day, or nearly (say) \$30,000 = per week. This value is equivalent to over 6600 lbs. 5-ct metal per week, or about 1650 tos. of pure nickel. Our present production Therefore rearcely surpasses the demand for the coin. Respectfully yours JatoBooth m. H.R.

bu 30 on though a 6 mis 3 4 50 the Song whatine has shower that nearly one half of this is new metal & one half ingotalishing stirrfore about 1225 the new metal made each day; which contains 306 the pure wickel, or for so days thought to the property of the second 3. Hence at the former note of consumplying we have a supply of pure Afrikel on hand for 32 weeks or for a weeks of 3 day - find bet the latter rate for 3 weeks whays It us take the lattery at 5 days per week instead of 5 to days, the supply is pefficient for 3 weeks a belays. 11. as marly as we can estimate, The demand for 5 and onetationed to be about \$5000 - por day, or nearly (say 430 per o per weeks. This water is especiallied a facility totas the 5-th metat per week, or about 105 willes of pure nickel. Our present production therefore warrely purpaper the demand for the coin. Wespectfully yours

JUN 21 1869
RECEIVED Treasury Pepartment, Office of the Supervising Architect,

June 19th, 1869. Dear Six Euclosed please find sketch plans for the proposed assay Office at Idaho, which have been prepared from memoranda furnished by the late Director of the mint. May trouble you to examine the plan and make duy suggestions in regard thereto at the earliest possible moveent as I desire to have the plans completed as soon as the site has been selected, for which purpose a Commission has been appointed by the Secretary of the Treas-The plan contemplates a building a story and a half high, which the late Director thought was ample, I presume also there had better be a basement for the storage of fuel, acids and other similar quaterial.

May I aske you to give me your views fully on the subject toblige your Respectfully from Physicing Architect Som James R. Pollock, Director U.S. Minh Philadelphia

Treasury Department Office Supervising Architect June 21 69 Enclosing Plan for assay Office at Idaho and Prof I to Booth's report There-on

Mint of the United States.

Thiladelphia 186_

The plan furnished by m' Mullett is an improvement upon the one sent to him from our assay Department, in having no doors a. the side, and in using the back door for taking in fuel. In other respects there is an agreement; and as amended, we consider the plan perfect. There will hartly be any new for storage of fuel and acids in an assay office in any large quantity, but it would be well to have a low basement, or cellar, chiefly below ground. The main story should be about 13 feet high, clear, for due ventilation to - A loft or attic above will be needed to store away old records to

Mint of the United States, MELTING & REFINING DEPARTMENT.

Philadelphia, 23 June 1869

Hon James Pollock Director of the U. A. mint

Dear Sir,

I have examined the Plan of the assay Office for Idaho, & observe in reference to it. 1. That the Simplicity of the Plan is in general tobe com -

mended, provided it fulfil its functions.

2. For the MAR. Depart There must be storage room for fuel, a crucibles, dome of the latter may be stored on shelves in the melting room, I there should be either a fixed or moveable bin for fuel in the same room, holding from one to several days supply. In the Plan, such bin Cannot be placed near the furnaces, a window or door on either side interfering.

3. I question whether there will be any need of 3 farnaces, as given in the Plan, & yet I would have 3 plues in the Hack (as in Plan) for future emergency. It appears tome that two furnaces will be ample for all their work.

Sporgot to observe that the square flue is better than the round, in order to take down & rebuild often, to procure all the bullion living the flue. I. 6. B

fuel, a counteles of tolocke Epoked anther may be stoned on

excluse and institute from your of where when he ather a

pared on movietle bea for fuel in the same noon let

form out to terrial diags out ply a butter land

The position of the purnaces at the end of the room is objectionable. For 3 furnaces Mere should be 2 coal bins. d the least space for such arrangement should not be less than 18 ft. I would be much better at 20 ft. In the room in the Plan, 16 x 24, the furnaces were better placed on the long side. If only 2 furnaces be serected, of course the 16 ft, will be sufficient. H. In regard tothe flues, their construction as given in Plan, aro objectionable, vix. built into, of made a part of the Wall, because the thinnels of brickwork outside the flues dllows too much heat to escape + diminishes draft, & because the inside of such flues have to be taken down to obtain their gold or silver lining. The thicknep of wall outside the flues should not be lefs than 9 inches, I were better still at 13 or more. For good draft plues should not be contracted to anything lef than 6 inches in def the in the wall, I our good drafts are due to 9 inches depth, as well as to height of Hack. of course it is architecturally better to gather the 3 flues into one stack, but then there must be a 2-foot space behind the furnaces to construct horizontal plues, leading each one separately to a vertical flue. Respectfully yours

AMERICAN ACADEMY OF ARTS AND SCIENCES,

BOSTON, MASSACHUSETTS, The neight should be exactly a troy famile. The

Dear Lie, and I simply was deal to the attended

the American Seading of Arts & Sciences have awarded their Rumford Premium to George At. Corliss of Providence, for improvements in the Steam Engine or have appointed a Committee consisting of Parf. I, Minlock Suft of the Cambridge Observatory, Prof. Stown of the Sechnological Suit of this City & myself, to preven the medals, Those previously given have been struck at the mint, & pusuning that those now wanted can be had in the Same manner, The Committee have forwarded the dies by Express to your.

Count Rumford directed that the Journium thould Courist of a gold + Silver medal, together, of the intimitive value of three hundred dollars." The Committee are advined that if the medals wer struck of the usual thickmen in proportion to diameter 12% inches), their

babue in gold would be smuch below that fixed by
the Founder. It has been Suggested that a plain
border lither evicular or polygonal could be added
to make up the weight. It has also been Suggested
that if the gold medal is struck with the framet dies
its might should be exactly a troy fround. The
Committee do not feel competent to decide on the
matter, and have directed me to ask your advice,
as to the best mode to be adopted in order to conform
to the directions of the Founder.

It is very descrable to use the present dies, but the Com to would like to know the proper diameter of new dies in order that the intrinsic value of medals of people thickness may be \$1300. in gold a thin probable cost.

Sony respectfully yours fames R. Francis Surry R. Lindonnan Est. Director of the M. S. Mint.

Philadelphia.

Collections when promptly paid, made without charge and remitted at current rate of exchange. When Notes or Drafts received for collection are not promptly paid at maturity, then a reasonable charge will be made, according to the trouble. Will give attention to such paper as requires to be collected through the Courts.

State and County taxes paid for non-residents.

Tegacion de Guatemala J.S. MINT corning the Unite JUL 15 1869 en los Estados Unidos. RECEIVED 319. Desington Ave. New Forts. July 14 th 1869. um month natice for our priese of som and we will be day of the By Tovernment decree some reforms have been recently introduced in the monetary system of Ematernala, which make it necesa by the winage of cents. I am desired by our Lecretary of State to make enquiries about the cost and facilities to coin said cents in the Minites thates one in reference to which metal it would "he preferable to use with the well unders-"Tood) that The Toverment wer not intend to make great profit in the coinage, as this knows have the inconvenience of giving I'a large incentive to counterfeiting. I therefore take the liberty to apply to you for whatever information you may be pleased to give me in the subject. It seems to me that the information required wonds be contained in there items: Fint = bost of Henry R. Sinderman Sogre, Director of the United States Mint Philordelphia.

wining the Minter States pieces of three, two, and one cents, expressing intrinsic value, and any particular you may think proper to communicate. Second. Athick metal and which propor thous you would advise for our pieces of same denominations, so so to give their an intrinsie value very near the nominal one lonper not very convenient to us, for danger of counterfeiting would be great in the neighbour my State of Honduras, where sound metal is very abondant. thing. Whether the comage of our cents could be mude at your Northonal Mint, and if so, at which charges. An anomer to these points or my others which your experience may suggest with be very thank fully received. I address this note directly to you and without the brand more of sensoing it Amongon the State Department, in order to suve smaller Some in transmitting my request to offer to you the assumme of my ristrictished consideration, with which I am your oft sevent. J. M. Mela Charge d'affaires from ma bemala and dalvador.

Legacion de Guatemala en los Estados Unidos. New York. July 20 M. 1869. RECEIVED! I had the honor to receive the note, which, in the temporary absence of the How. M! Pollock your hard) The Mindness to dendime. In reference to the two queries in your lets ter I have only to day that I think your present allow, of 14 mickel with 14 copper, must suit my Tovernment, being, as you inform me, more difficult towork than copper I would, however, thank you for information as to the intrinsic value of your present alloy and of some other ones that would come neaver still to the nominal value, I could then transmit your informathon to Quaternala, and there they would make Their own detection. I saw say nothing positive about amount of coinage desired but I am inclined to think the I it should not exceed one hundred thousand dollars in value. I am Despectfully Four obedient dervant. . J. M. Wela! He. b. Hithook, by se built of the United States. Chartes the Mint of the United States.

RECEIVED

At. I Branch Mint Carson City nev. august gibsolg.

Thave to acknowledge the re-- ceipt of yours of 24 that's enclosing copy of Dept. letter of 33 " ulto. The Machinery will all be ready for operation by the last of the present weak except the assaying and refining rooms. I have frequently unged the Ussayer to come on and take charge of fitting up his moms but he has not done so and but a few days sence lendered his ving-- nation, which I immediately in-- closed to you I am satisfied that the Meller and Refiner does not sistend to accept the position and as his trommeron has not been issued have respectfully to rece

ommend that an appointment of some suitable person be made. I have motition this day to Mr Linderman at Sunt rancisco, suggest. ing that he seemsnend from among the experts at the mint at that place some person papables of performing the duties of Meller Hefines. This Mint will be ready for of - evaluous by the PB province, provided the officers above named can be appointed and be ready for duty. By some oversight mille act of March 3 + 84.9. There was no mention made of the salary of a Correct . have therefore to migning which sleps and necessary to enable the apo - posistment of a leomer to be made or the appointment of some person as acting Comer until the next session of Congress. Should a Coiner be appointed it mill be advisable

I think to formand the dies at one as the coming machining is well in order. I would like rif deerned proper to have dies for silver dollars forwarded mich the others. There is great anxiety among the people here to exchia Branch sis operation and Law ung every effort to expedited the labor of pulling in machining and getting ready for operations.

Tery Respectfully. Hon James Follock. Director of the Mint. Philadelphia, Pa

Sir:

I have received your letter of the 29"

Lettimes enclosing copies of the correspond
ence of the Minh of the United States with

Hon. J. M. Vela, Charge d'Affaires of

Greaternala relative to the execution by

the mint of about one hundred thousand

dollars of bronze or mickel coinage for

the use of that government:

Your suggestions in favor of com-

flying with his request have been carefully considered; but the Secretary is of
the opinion that, as there is no law
authorizing the mint to Execute coinage
for foreign governments, he would not

be

be justified in authorizing the munt to Very Respectfully

Mr. J. Richardson Acting Secretary of the Treasury Hon. James Pollock, Director of the Mint Philadelphia.

Treasury Department Aug 3 = 1869

the Secretary thinks he would not be justified in authorizing the mint to undertake
the Coinage of One Hundred
thousand dollars worth of
Small coin for the Government
of Guatemala

AUG 27 1869.)

Melting & Refining Department

Philada 27. Aug 1869

Hon James Pollock, Director of the U. S. mint Dear Sir,

as the lot of Silver, received on the 18th Sust. from the S. y. apray Office is of a very inferior character, and I have often had occasion to note the inferior quality of much of the heetat rece from that Office, I was induced to ascertain how for your Instructions had been carried out, that a quantity of fine silver should be sent from the alsay Office to the mint sufficient to raise the whole to Hatidard finances. Mr Boyd has made This calcu lation of the groß & standard weights fall such shipments since the beginning of the year (1869). The following is The summary of groß & standard

weights, & the except of base metal, above that

required to make standard.

groß wight standard weight Except base metal

203,660.25 ox. 199,029.51 ox. 4,630.74 ox. Hence the deliveries of fine silver to make up Handard have been short by 41,676.66 oz. It is even worse than This statement, for in the above sum is embraced a deposit of 6,566.55 ox. of fine silver delivered in January, to compensate for a previous delivery in 1868 of inferior silver. The total deficient supply of fine silver from the N. y. Afray Office, up tothis date in 1869, is therefore over 50,000,00.

You can now perceive why I was obliged to refine a lot of silver expressly to meet our dismands, and also why I have not an ounce of silver to spane to make up into coin the base silver deposited on the 18th I hast. The 26,000.02. received the same day were required for previous lots of N. y. silver. I have now a Requisition from the Yreas Dept for \$40,000 = in half dolls. which cannot be filled for 2 or 3 weeks, unless I refine a quantity of Silver

required tomake standard.

groß weight standard weight Except base metal

203,660.25 ox. 199,029.51 ox. 4,630.74.02. Hence the deliveries of fine silver to make up Handard have been short by 41,676.66 oz. It is even worse than This statement, for in the above sum is embraced a deposit of 6,566.55 ox. of fine silver delivered in January, to compensate for a previous delivery in 1868 of inferior pilver. The total deficient supply of fine silver from the N.y. Afray Office, up tothis date in 1869, is therefore over 50,000,00.

you can now perceive why I was obliged to refine a lot of silver expressly to meet our demands, and also why I have not an ounce of silver to spare to make up into coin the base silver deposited on the 18th I wit. The 26,000.02. received the same day were required for previous lots of N. y. silver. I have now a Requisition from the Ireas Deptor for \$40,000 = in half Jolls. which cannot be filled for 2 or 3 weeks, unless I refine a quantity of Silver

expressly by solution, to for the purpose. If this is to be done, who ought to bear the cost of it?

again, I am sorry to be fault-finding, but the Interests of the government demand it, at least so it appears tome. much of the silver rece from the M. y. Alsay Office is very base, especially that which has been latterly received, I this baseness is not due to leopper only (which would not be objectionable, if There be fine silver with it), but also to lead, tin, autemony, to. In melting such silver, in order to tougher it, the cost does not alone consist in the fuel, flux, crucible, time, te. but also in the actual lop of some silver by volatilization with a more volatile metal. my accounts, i.e. the government, now bears this loss, whereas it should properly fall on the depositor. Every deposit, when necessary, should be toughened, and only the weight & apay after

such metting accredited to the Depositor. at present, as you are aware, we receive each N.y. lot by the weight of the alsay Office, & are therefore subject to any possible loss in preparing the metal for coinage. you will please observe that the deficiency of fine silver applies to the present moment, & prevents me from filling the Requisition for half dollars, fully tothe extent of \$10, or \$15,000 Very truly yours Jat Booth m. F. PC.

I 6 Booth MAR US Mint

In reference to the very inferior quality of Silver rece from N.Y. Assay Office.
